><p>Hey guys, that's pretty much it for this "story", I wanted to make something short and concise about how someone could theoretically cheat the system in-lore to make some extra credits. The formatting is a bit off on this site sadly, as it doesn't accept the style I originally wrote the story in. I modified it a bit to make it look closer to the original version.
**

Thank you for reading! If you liked it please look at my other StarCitizen fan fiction (this one is an actual story) "The Praetorian". If you **really** liked it, please leave your thoughts on the comment section.
